Policy for Internet Use

With a single DSL line, there are practical limitations that will affect the speed of transmission of downloading and uploading information from the internet. The policies below will help students who wish to use the internet to do so with a minimum of wasted time. This service is a privilege that will work out only if students follow the guidelines.

(1) Compose your emails off-line as time allows with the wireless switch on the pen tablet in your care off.

(2) Only when it is your turn in the sign-up order for on-line internet use each day should you log on the system after turning the wireless switch on.

(3) As soon as you are done using the Internet on-line, then inform the next person on the list so there is no unnecessary gap in usage so nobody has to wait up late to send and receive their emails.
