

RICHARD ALLEN

Director, Berkeley Seismology Lab

Class of 1954 Endowed Professor, Dept. of Earth & Planetary Science

<http://rallen.berkeley.edu/> | rallen@berkeley.edu

Professional Appointments

University of California, Berkeley

Interim Dean, Mathematical and Physical Sciences	2021-2022
Chair, Dept. of Earth and Planetary Science	2015-2018
Professor, Dept. of Earth and Planetary Science	2012-present
Director, Berkeley Seismological Laboratory	2011-present
Associate Professor, Dept. of Earth and Planetary Science	2008-2012
Assistant Professor, Dept. of Earth and Planetary Science	2005-2008

Google

Senior Staff Research Scientist	2022-present
Visiting Faculty	2019-2022

Harvard University, Visiting Scholar

2018-2019

ETH Zürich, Institut für Geophysik, Switzerland, Visiting Professor

2011

Institut de Physique du Globe de Paris, France, Visiting Professor

2010

University of Wisconsin-Madison, Dept. of Geology and Geophysics

Assistant Professor of Geology and Geophysics 2002-2004

California Institute of Technology, Seismological Laboratory

Texaco Prize Postdoctoral Research Fellow in Geophysics 2001

Education

Princeton University, Dept. of Geosciences Ph.D. 2001

University of Durham, UK, Dept. of Geological and Geophysical Sciences M.Sc. 1995

University of Cambridge, UK, Natural Sciences B.A. 1994

Research Interests

My research group studies large-scale tectonic processes, and short-timescale earthquakes.

- **Real-time seismology.** New techniques allow rapid characterization of earthquakes using seismic and geodetic data. We now apply these methods to provide earthquake early warning algorithms implemented as "**ShakeAlert**" in the U.S. and around the world.
- **Massive distributed sensing systems.** Traditional geophysical networks are being complemented by networks of private smartphones to analyze earthquakes. "**MyShake**" is our global smartphone seismic network with 2 million citizen scientists participating.
- **Subduction zone dynamics.** The biggest earthquakes and volcanoes are the products of large-scale mantle convection at convergent points known as subduction zones. We integrate seismological imaging techniques to constrain structure and infer dynamics in **Cascadia, Alaska** and **Japan**.

Teaching and Outreach

Engaging with students and the public increases awareness of science, develops the next generation of scientists, and provides new insights. Current activities include:

- **“Earthquakes in your backyard”** is an introductory-level class at UC Berkeley focusing on the science, engineering and societal aspects of earthquakes. Taught each year to 500+ students, the class enrolls about 5% of all Berkeley undergrads.
- **Public talks and seminars** on topics of earthquakes, hazard, risk, mitigation and ongoing research efforts in the solid Earth science in the Bay Area, across the U.S., and internationally.
- **Media articles and documentaries** provide exposure to our research for millions of readers and viewers. Our work has been covered in hundreds of publications around the world including the *New York Times*, *London Times*, *Los Angeles Times*, *San Francisco Chronicle*, *Scientific American*, *National Geographic*, *Time*, *Newsweek*, *Der Spiegel*, CNN, BBC, NBC, CBS, ABC, FOX News, NPR, Al Jazeera, NOVA, and the Discovery Channel.

Advisory Activities

Testimony and briefings for legislatures, legislators and senior government officials:

- **California Governor Gavin Newsom:** Public alerting across the state.
- **White House:** Earthquake Resiliency Summit; Office of Science and Technology Policy.
- **U.S. House of Representatives:** Committee on Transportation and Infrastructure, Subcommittee on Economic Development, Public Buildings, and Emergency Management; Committee on Natural Resources, Subcommittee on Energy and Mineral Resources.
- **California State Senate:** Government Organization and Natural Resources Committees.
- Michelle Bachelet, Former **President of Chile**.
- Floyd Kvamme, Co-Chair of **President Bush’s Council of Advisors on Science and Technology**.
- James Lee Witt, **Director of the Federal Emergency Management Agency**.
- Jack Gibbons, **Science Advisor to President Clinton**.

Advising on the use of current real-time earthquake information:

- **Private organizations**, including: Google, Apple, Boeing, Chevron, Genentech, Hewlett Packard, Lam Research, Life Technologies, Intel, Microsoft, PG&E, Red Cross, So. Cal Edison.
- **Government agencies**, including: Bay Area Rapid Transit (BART), California Dept. of Water Resources, CalEMA, CalTrans, California Seismic Safety Commission, City of San Francisco.

Professional Service

Chair, National Academies, Committee on Seismology and Geodynamics, 2015–2019.

Chair, U.S. Earthquake Early Warning Science R&D Committee, 2006–2016.

Chair, Ocean-Bottom Seismometer Instrumentation Pool, IRIS Oversight Committee, 2015.

Principal Organizer, 3rd International Conference on Earthquake Early Warning: Implementing Earthquake Alerts. Berkeley, California, Sep 3-5, 2014.

Member, Cascadia Initiative Expedition Team deploying seafloor instruments, 2011-2015.

Chair, International Earthquake Early Warning Advisory Committee, Geological Institute of Israel. 2012-2013.

Chair, National Science Foundation, Amphibious Array Steering Committee, 2009-2012.

Chair, IRIS PASSCAL Standing Committee. 2009-2011. Member 2008-2011.

Honors and Awards

- Popular Science. One of the 100 greatest innovations in 2020 2021
- Class of 1954 Endowed Professor, UC Berkeley 2017
- National Science Foundation, GeoPRISMS Distinguished Lecturer 2015
- Tel Aviv University, Yuval Ne'eman Distinguished Lecturer 2014
- Noyce Prize for Excellence in Undergraduate Teaching, UC Berkeley 2008
- Hellman Faculty Research Award, UC Berkeley 2006
- Discovery Magazine. In the top 100 science stories 2003

Patents

Smartphone-based earthquake early warning systems. Licensed to Google 2019.
